Muhasib ERP v1.1.3 Release Notes

Release Information

Release Information	Details
Product	Muhasib ERP
Version	**v1.1.3**
Build Number	**213**
Release Date	February 2022
Release Type	Feature and Maintenance Update
Status	Published
Audience	All Users

Summary

Muhasib ERP v1.1.3 introduces module-based application setup, improved inventory calculation controls, a price change utility, online registration, expanded invoice layouts, and stronger purchased-module enforcement.

The release also improves temporary sales, quotations, payments, item bulk editing, inquiry searches, average cost calculation, and tax reporting while resolving several conversion, item status, and FBR calculation issues.

New Features

Module-Based Setup

The main application interface and related forms now support module-based setup and purchased-module restrictions.

Features and forms are made available according to the modules enabled for the applicable installation.

Price Change Utility

A price change utility has been added for supported sales interfaces, together with related configuration in Global Settings.

Online Registration

An Online Registration form has been introduced and aligned with the applicable registration API.

Customize Invoice 2

A second customizable invoice layout has been introduced across applicable transaction and inquiry forms.

Average Cost Recalculation

A new setting allows Muhasib ERP to recalculate the average item cost price when purchase transactions are recorded.

Inventory Calculation Method

A default Inventory Calculation Method setting has been added.

Inventory calculation can now consider multiple applicable sales transaction types rather than being limited to completed and temporary sales.

Improvements

Quick Launch

The Quick Launch button has been removed from the main Back Office menu and the Quick Launch workflow has been refined.

A dedicated Quick Launch option has been added to Instance Settings.

Item Bulk Edit

- Added Item Name to item stock import and export.

- Added Maximum Item Discount.
- Improved Excel file reading and processing.
- Corrected bulk item edit validation and processing.
- Ensured Excel processes close correctly after report or file generation.

Find Item

Items without an assigned category are now displayed correctly when all categories are selected.

Total Discount Distribution

When a total percentage discount is applied to a sale, the discount can now be distributed across the items included in the transaction.

Temporary Sales

- Added payment status to the temporary sale invoice layout.
- Improved validation requiring at least one item before completing a transaction.
- Corrected temporary sale conversion to invoice.
- Added Amount Due to Temporary Sale Inquiry.
- Added Date Modified to temporary sale records.

Inquiry Improvements

- Added Date Modified to Single Sale, Temporary Sale, and Quotation Inquiry.
- Added quotation search by customer, customer contact, or invoice number.
- Improved temporary sale inquiry visibility.

Expense and Payment Forms

Amount Due has been added to Expense Payment, Customer Payment, and Supplier Payment workflows.

Default Payment Type

Checkout now applies the configured default Payment Type automatically.

Fixes

- Corrected item enable and disable behavior across affected forms.
- Corrected purchased-module restrictions in remaining forms.
- Corrected temporary sale and appointment conversion to invoice.
- Corrected FBR tax calculations in both supported sales interfaces.
- Corrected the FBR Tax Report.

- Improved invoice layout validation and display.
- Resolved minor Excel, item, registration, and inquiry issues.

Important Notes

- Review purchased-module access after updating.
- Confirm the default Inventory Calculation Method.
- Review average cost recalculation settings before recording purchases.
- Test temporary sales and appointment conversions.
- Verify the configured default Payment Type.
- Test FBR tax calculations on representative transactions.

Known Issues

No critical known issues were documented for this release at the time of publishing.
