Review Item Sell Price Change History

How to Review Item Sell Price Change History in Muhasib ERP

Overview

This guide will help you identify selling-price changes and determine who changed which price level and when.

You get a traceable selling-price timeline.

Who can do this

You need access to Sell-price history and authorized price visibility.

Before you start

Have item, price group/level, date range, old/new price, user, or incident.

> Before saving, check that the correct company is open and that you have permission to complete this task.

Where to find it

Back Office → Items & Advanced Inventory → Item Sell Price Change History.

Review Item Sell Price Change History

Step 1: Set company/date/item filters

Step 2: Generate the report

Step 3: Review price level/group, old/new price, timestamp, and user

Step 4: Compare with item multiple prices and price groups

Step 5: Check affected sales timing where necessary

Step 6: Preserve evidence for unauthorized changes

Check your work

History explains current item/price-group values and representative sales pricing.

> Take a moment to check your work before closing the window. This small check can save time later.

If something goes wrong

- Check multiple price levels before assuming the base price changed.
- Discounts/promotions may alter sale price without changing the master price.
